

Single-switch heating system in Markt Schwaben Germany

Markt Schwaben station is situated on line 5600, Munich East – Simbach (Inn).

RSBT GmbH has completely renewed the existing point heating systems at Markt Schwaben station on behalf of Deutsche Bahn. As part of the project, new concrete control boxes were erected and the entire system was connected to the new 50 Hz power supply.

This also included the laying of new cables and the installation of new junction boxes alongside the tracks. The individual points were dismantled and fitted with new heating elements and locking compartment heaters.
