

Modernisation programme for Lengerich railway station Germany

Location: Germany
Client: DB InfraGO AG
Construction period: July 2023 – October 2023
Services: Modernisation programme featuring lighting columns, media channel lights, LED wall and ceiling lights
Contract value: 473,000 euros

As part of Deutsche Bahn's modernisation programme, the lighting system at Lengerich station was comprehensively refurbished and brought up to the latest technical standards.

To this end, a total of 28 conical lighting columns were erected and fitted with modern top-mounted luminaires.

In addition, 42 energy-efficient LED media channel lights were installed, ensuring uniform and needs-based illumination of the platform areas.

Furthermore, LED wall and ceiling lights were fitted to provide optimum lighting for both the passenger waiting areas and the walkways.
