

Enabling Future Mobility

Competence and Perspective

// Why you should definitely work at Rhomberg Sersa Rail Group.

About Rhomberg Sersa Rail Group

As a leading railway technology company, we offer our customers one of the most complete range of services in all aspects of railway construction and infrastructure services. This is supported by state-of-the-art technology, highly competent staff with many years of experience and, most important of all, an outstanding professional and diverse workforce of over 2,600 employees. They are experts with invaluable experience gained from complex projects delivered worldwide. They work to implement our vision, which goes far beyond the company itself – driving towards the success of the railway through innovative solutions, reduction of costs, increased efficiency, reduced environmental impact whilst maintaining safety as a core objective of our business.

We offer services covering the entire railway engineering spectrum, including consultancy, project design, planning and construction management. Our range of services includes specific construction and maintenance services inclusive of, but not limited to; mechanised track construction, plain line renewal, Switch and Crossing renewal, track maintenance, rail welding and ballast formation treatment. In addition, our innovative products ranges from Slab Track design and renewal, measuring and surveying technology, the Sersa Second Life System® (SLS) and professional systems such as consultancy and safety critical labour supply. Our expertise also includes all aspects of high and low voltage electrical infrastructure.

We demonstrate our expertise in major projects such as the construction of the Koralm tunnel, the new Wendlingen-Ulm line, and the Cologne North-South urban rail line. The focus is on customer-oriented and tailored solutions for light rail, main-line railways, freight lines or private infrastructures, which are carried out as the main or general contractor.

We as employer are

Familiar: We are a family business established in 2012 following the merger of Rhomberg Rail and the Sersa Group that thinks in generations. We meet each other with mutual appreciation, respect and at eye level, regardless of hierarchy or title. Personal proximity and good relationships between employees, customers and partners speak for us.

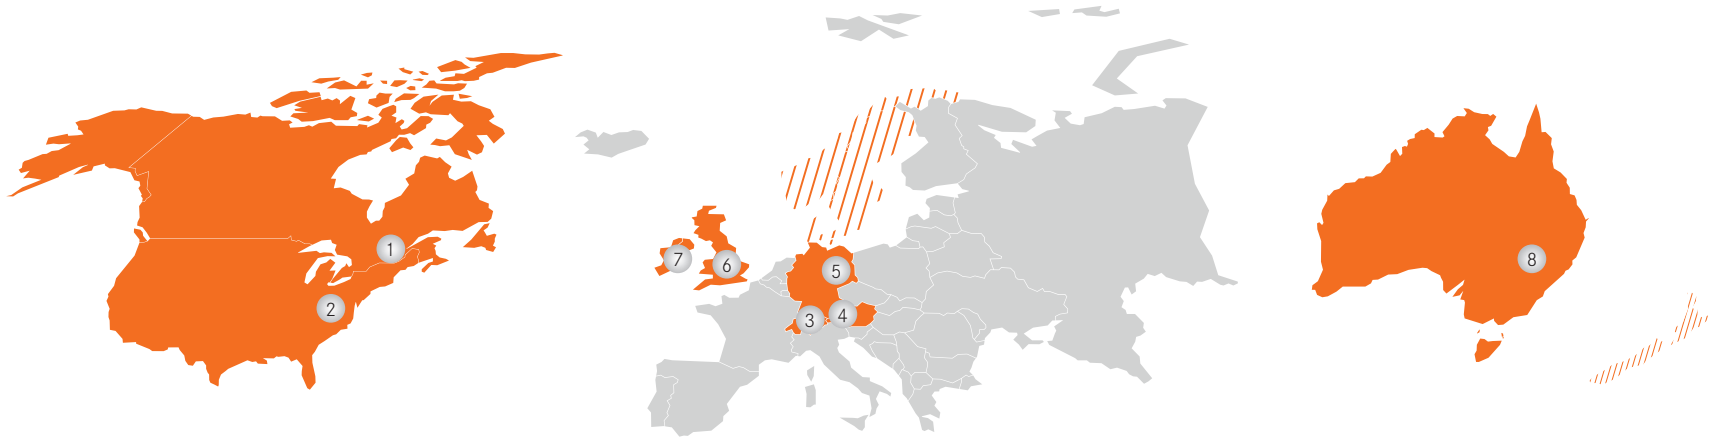

Perspective: The principle of sustainability plays an important role in the selection of our employees. Our aim is to establish the longest possible employment relationships. With a wide range of career and development opportunities, we ensure that our employees can develop both professionally and personally. Our size enables us to constantly offer our employees new, sufficiently large and interesting tasks.

International: Rhomberg Sersa Rail Group employs specialists from many countries for many countries. Employees from multiple cultural backgrounds are operating on three continents, in eight markets and at over 100 locations worldwide. Therefore, assignments abroad are gladly possible with us.

Innovative: We are always open to new ideas and, true to the motto „standstill is regression“, actively work to advance our company, our employees and our customers with sustainable ideas. This is achieved through innovative strength, the use of state-of-the-art machinery and future-proof technologies. Thereby, we always remain responsive, flexible and thus secure our position as technology and innovation leader and consequently so do our jobs.

Team-oriented: We maintain a sincere, open and honest relationship with each other, our employees, customers and partners. We share our knowledge and experience and unite different ways of thinking. The common goal is in the foreground.

Flexible: We rely on trust and a high degree of self-responsibility and grant our employees the necessary freedom and scope for decision-making. For us, people are at their most successful when they are in their right environment, which is what we're here to build.

Start your career with us. Entry opportunities are available for example, as:

Technical

- (Junior) site manager
- Project manager
- Foreman / forewoman
- Calculator
- Civil engineer
- (Civil-) engineer for digitalization measures with focus on BIM
- Surveyor
- Digital construction engineer
- Electrical engineer
- BIM coordinator
- BIM modeller
- Construction technician
- Project technician railroad power supply
- Control and safety technician
- Equipment technician
- Metal fabricator
- Warehouse management
- Electrical fitter for energy and building technology

- Electrical fitter for operating technology
- Electrical fitter for information and telecommunication technology
- (Construction) mechanic
- Electrician
- Mechanic
- Track builder
- Machine warning system operator
- Locomotive driver
- Driver operator (A2/A3)
- Two-way excavator operator
- OTM driver operator

IT

- Data engineer
- System developer

Commercial

- Commercial construction manager
- Office administrator
- Project assistance

Education & studies

- Apprenticeship
- Internships
- Dual studies
- Bachelor & master thesis
- Employment as working student
