

Geodata Services

The correct handling of spatial information

Product description

Our geodata specialists provide support for all questions relating to your geodata. We prioritise consulting and knowledge transfer so that you can later process the relevant data independently.

Our services

- Conversion of geodata into the desired format
- Creation of data models
- Automation of data workflows
- Enrichment/enhancement of geoinformation
- Training and support

Your advantages

- Freely selectable service - from a sub-step to a complete workflow
- Expertise for in-house track construction
